Good Evening Mark:

Thanks again for stopping by and working through everything today. I will keep you posted on our sampling and the utility clearance. We may not use your back area for the background samples since you informed us that it is fill. We shall see. We may use the back woods of the Weber property which looks like native soil and we have gamma survey results already.

I wanted to send you the most recent Pollution Report for the Site. I believe we reviewed some of this information but just in case. We finished excavating the majority of the interior office building of GNBC. We need to survey the office area and then perform our post excavation sampling. If all goes well those samples will go out before we leave this Thursday. We are starting to clear trees in Area 5 (western wooded area between the hotel and bowling alley parking lot) in order to excavate.

I hope you enjoy the rest of your summer if I don't talk to you before we leave on Thursday. Thanks

Attached is a Pollution Report (POLREP) regarding:

USEPA Region II  
Niagara Falls Boulevard Radiological Site  
9524-9540 Niagara Falls Boulevard, Niagara Falls, NY

To view this POLREP, please open the attachment.
